

Order #XXXXX - ECO-1025 - 10' x 10' Sustainable Hybrid Display

## General Setup Instructions

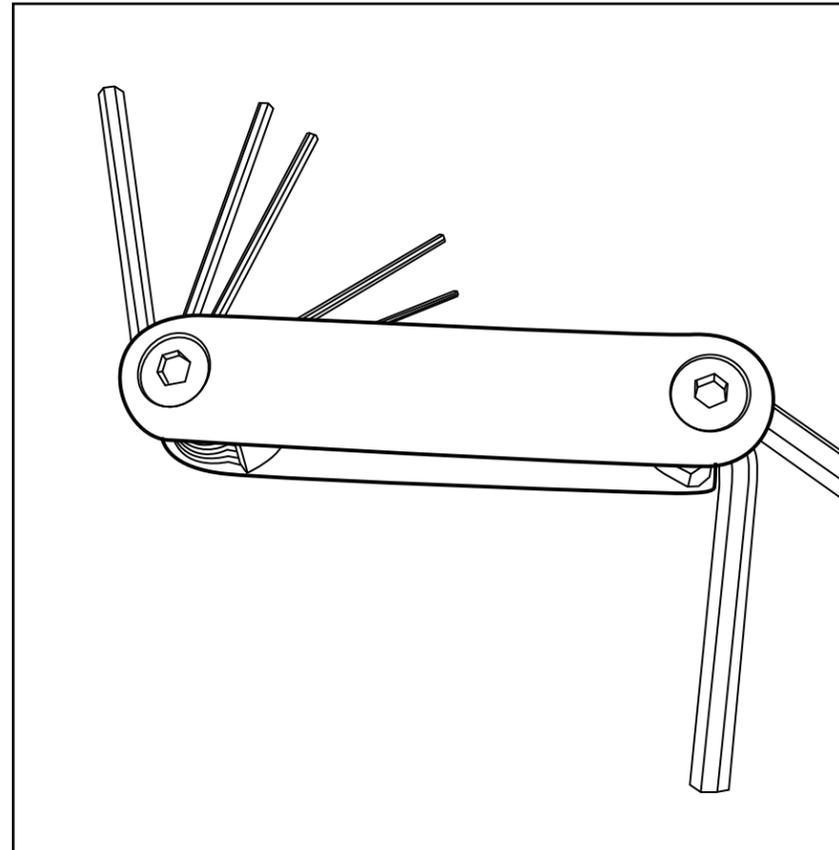

- The setup instructions are created specifically for your configuration.
- Setup instructions are laid out sequentially in levels, including exploded views and a logical series of steps for assembly. We encourage you to study the instructions before attempting to assemble your exhibit.

## Cleaning and Packing

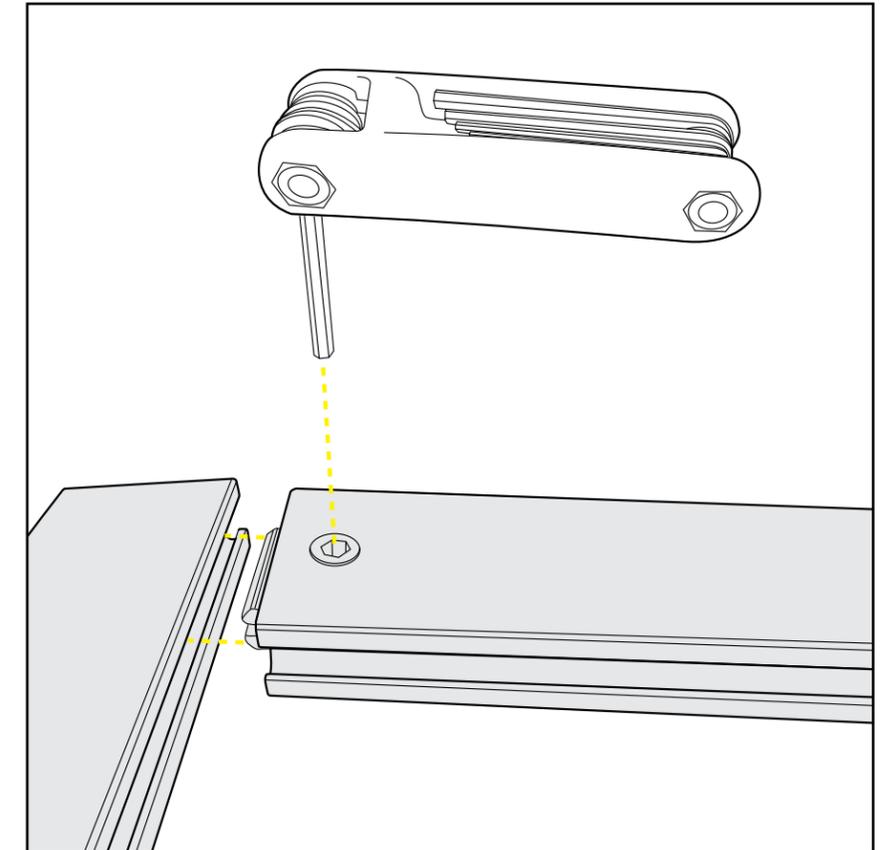

- Use non-abrasive cleaners when cleaning extrusions or ECO Glass inserts.
- Use mild cleaners and soft materials such as cotton to clean all laminates.
- Keep exhibit components away from extreme heat and long exposure to sun light. This will prevent warping and fading.
- Retain all packing material for ease of re-packing. This protects the exhibit components and keeps each part organized.

## Disassembling

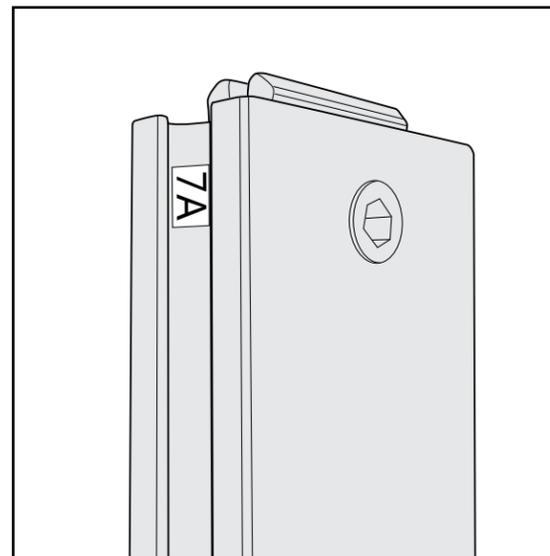

- When disassembling exhibit, tighten all setscrews to prevent loss of hardware in the shipping process.

## ECO Panel Install

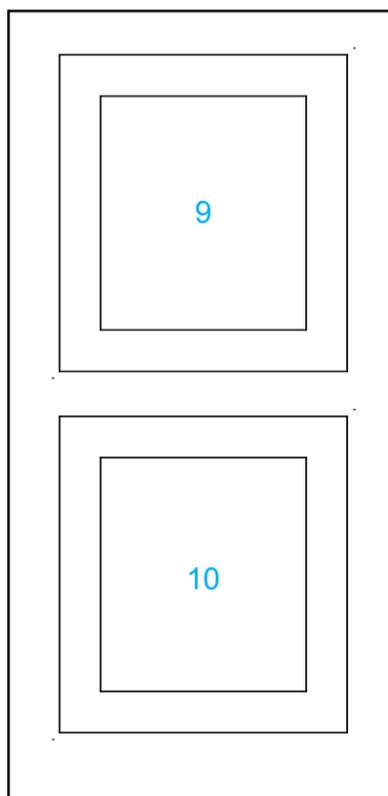

- 1 Place ECO panel together with a vertical offset, slide down to lock connector in place.
- 2 Panel Corner Connectors are installed just like ECO panels. Remove by off-setting top lock clips horizontally followed by separating vertically.

## SEG Graphic Install

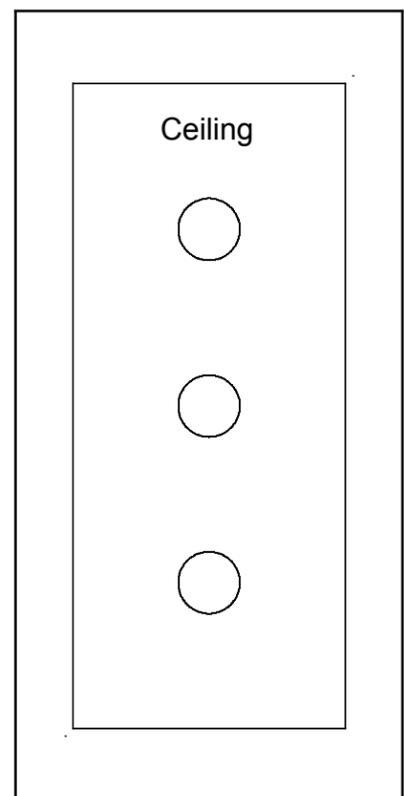

- 1 Graphic is installed corners first. This allows a proportional fit around the perimeter of the extrusion.
- 2 Locate channels along the edge of the extrusions.
- 3 Fold over graphic (hiding threads) and tuck silicon edge and fabric into corners.
- 4 After corners are complete, slide in the rest of the graphic into channel. (From edges to center)
- 5 Graphic is installed. Stand back and be amazed!
